

E-Z UP® INSTANT SHELTERS®

HOW TO SET UP YOUR E-Z UP® SIDEWALL ACCESSORY

E-Z UP® SIDEWALL SET UP:

Your E-Z UP® Sidewalls are designed to be used with the legs of your Instant Shelter® frame set to the highest height position.

1. Attach the sidewall to the frame as shown by wrapping the top hook & loop strips around the upper trusses and above the pull-pin sliders.
2. Then attach the side hook and loop strips around the legs.
3. Press all the hook and loop strips together firmly.
4. Repeat steps above for remaining sidewall/s.

Note: The top of sidewall tucks underneath fabric top.

IMPORTANT INFORMATION

1. To insure proper sidewall fit, slightly position legs inward and then attach sidewalls.
Note: Walls should be attached BEFORE frame is staked down.
2. Always stake or weight down your E-Z UP® shelter. Do not use in any potentially windy or rainy weather. Wind and rain can damage the E-Z UP® shelter and may also result in injury to you or others. Therefore, do not rely on shelter for protection in heavy or prolonged rain storms.
3. The E-Z UP® shelter is designed as a temporary sun shelter. Do not leave up for extended periods.
4. Use caution when handling the E-Z UP® frame. Avoid pinching hands or fingers as frame opens or closes.
5. Do not use shelter in a lightning storm.
6. Do not leave your E-Z UP® Instant Shelter® product unattended.
7. Do not build fires under shelter.
